DETAILED ACTION

Election/Restriction

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Claims 1-17, 30-31 directed to a first non-rigid dielectric wiring level formed on the first rigid dielectric layer having at least one interconnect; a second rigid dielectric layer formed on the first non-rigid dielectric wiring level; and a structural securing means associated with the non-rigid dielectric wiring level for preventing a portion of the first or second rigid dielectric layers adjacent the interconnect from delayering from the interconnect.

Species II: Claims 18-23 directed to a first non-rigid low k dielectric layer formed between the first and second rigid dielectric layer; and a plurality of dummy fill shapes of the first non-rigid low k dielectric layer with lower coefficient of thermal expansion (CTE) metal such that an overall CTE of the first non-rigid low k dielectric layer and the plurality of dummy fill shapes matches a CTE of the first and second rigid dielectric layers more closely than that of the first non-rigid dielectric layer alone.

Species III: claims 24-29 directed to a third rigid layer formed in the second non-rigid layer; at least one interconnect formed in the second non-rigid layer extending between the second and third rigid layer; and at least one dummy fill shape formed in the second non-rigid layer extending between the second and third rigid layer; at least one dummy fill shape being positioned in a susceptible area in proximity to the

Art Unit: 2815

interconnect to maximize strength to the structure and prevent the second and third rigid layer adjacent the interconnect from de-layering away from the interconnect.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2815

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
